About Mark N. Coreil, DDS

Dr. Mark Coreil, Board Certified
Private Practice: Orthodontics - Houma, LA

Mark N. Coreil, DDS is a Board Certified orthodontist. He has worked with children who have craniofacial problems over the past ten years. Dr. Coreil is Assistant Professor of Clinical Orthodontics at the Louisiana State University School of Dentistry and is actively involved as an orthodontist on the Children's Hospital Cleft and Craniofacial Team. Dr. Coreil graduated from Louisiana State University School of Dentistry in 1986 and completed his orthodontic specialty training at LSU in 1988. Dr. Coreil completed the Roth/Williams Advanced Clinical Program in 1993.

Aesthetic Treatment in Orthodontics

Course Objectives

At this course, the attendees will learn:

- ❑ Advantages of the interactive bracket
- ❑ The use of a true straight-wire appliance and proper bracket placement
- ❑ Optimal aesthetics, a comprehensive approach to working with the restorative dentist in complex cases
- ❑ The use of springs in order to obtain Class 2 correction
- ❑ Diagnosis, computer diagnostic imaging and mechanics
- ❑ The proper placement of temporary anchorage devices
- ❑ How to complete limited tooth movement with lingual appliances
- ❑ Clinical application of the diode laser

Course Description

Ceramic Brackets

- ❑ A complete presentation on the numerous advantages of an interactive self-ligation bracket system
- ❑ An in-depth comparison with the competing systems
- ❑ Numerous cases included

Bracket Placement

- ❑ The use of a true straight wire appliance requires an in-depth knowledge of proper bracket placement
- ❑ This will allow the clinician to totally eliminate any bends in the archwire while obtaining exceptional results
- ❑ A discussion of the appropriate prescription will be covered in detail

Orthodontic Bonding

- ❑ This will provide the clinician with the knowledge needed to reduce bond failures to a minimum

Temporary Anchorage Devices

- ❑ A discussion on proper placement, advantages of different systems, and the ability to use these devices to the maximum potential

Diode Laser

- ❑ A discussion on proper case selection and how to implement the diode laser into clinical orthodontics

Lingual Minor Tooth Movement

- ❑ Learn how to use the new invisible self-ligating system for cosmetic aligning of the anterior
- ❑ This system provides excellent results without expensive lab fees and need for patient cooperation

Orthodontic Treatment For The Restorative Patient

- ❑ This presentation includes the discussion of optimal aesthetics, the art of the smile, diagnostic wax-ups and occlusion
- ❑ A comprehensive approach to working with the restorative dentist in complex cases

Non-Cooperation Appliance

- ❑ A discussion on how to use the springs to obtain Class 2 correction in the most difficult cases without patient cooperation and finish in centric relation

Roth Philosophy

- ❑ A complete discussion on diagnosis, computer diagnostic imaging, and mechanics
- ❑ This lecture involves mounting, centric occlusion records, instrumentation and techniques used to achieve optimal orthodontic results
- ❑ Numerous cases included

CASE STUDY

NON-EXTRACTION CASE WITH A TREATMENT TIME OF 13 MONTHS
