La Jolla, CA 92037

CE Credits

5.5

Dr. Jack C. Fisher, D.M.D., Board Certified
Private Practice: Orthodontics -
Dyersburg, TN & Memphis, TN

Dr. Fisher has maintained a practice limited to orthodontics since 1982. He has had an interest in the treatment of temporomandibular joint disorders. Dr. Fisher has placed in excess of one thousand Temporary Orthodontic Anchorage Devices. He has lectured, both nationally and internationally, to many state, local, and orthodontic study groups on the subject of Temporary Orthodontic Anchorage; he has also lectured to approximately twenty resident programs in the US and Australia. He continues to work with orthodontic residents on a regular basis at Vanderbilt University and the University of Louisville. He is presently a consultant for GAC International concerning TADs. Dr. Fisher conducted a pilot study for the United Orthodontic Buying Group, evaluating the use of the TADs presently marketed in the U.S.; and he has also lectured to this group concerning these devices, as well as on the subject of distraction osteogenesis. Dr. Fisher, under the company of TOADS, LLC, holds several patents on these devices. He has published three articles on the subject of Temporary Anchorage Devices, and is presently developing accessories related to these devices.

About This Course

Temporary anchorage is literally revolutionizing orthodontics by making possible indications that were never before feasible. Surgery cases are significantly reduced and patient compliance is no longer a factor. Treatment time is slashed and unsightly headgear is a thing of the past. These are just a few reasons TADs are quickly becoming the standard of care in orthodontic practice. With the proper use of TADs you can achieve the impossible in orthodontics.

Dr. Fisher is passionate about helping others become successful in implementing TADs into their practice. You have a unique opportunity to learn from his years of experience and avoid the same mistakes he made. There is a learning curve associated with implementing TADs into your practice, and by attending our course you drastically expedite this curve. You will gain the confidence and competence you need to successfully place and get the most out of TADs in your practice.
